### LENGTH:

28.00m

### EAVE HEIGHT:

7.00m

### ROOF TYPE:

Insulated 60/40mm sandwich panel

### WALL TYPE:

Insulated 60mm sandwich panel

Recycling experts L chner recently needed more storage space to expand their existing operation and ensure all waste and recycling was undercover, secure and dry.

The company set about finding a building supplier who could offer an affordable, fast and functional solution.

After researching a range of options they found HTS INDUSTRIEBAU and got in touch. An insulated warehouse building was supplied from the Ultra-Span range with a 7 metre eave height to accommodate the large recycling machinery. The building provided 560 sq metres of additional operational and storage space and had 2 vehicle access doors and 3 personnel doors.
