

KEY INFORMATION

BUILDING TYPE:

ULTRA-SPAN (SP14°)

WIDTH:

30.00m

LENGTH:

55.00m

EAVE HEIGHT:

5.20m

ROOF TYPE:

Insulated 60mm sandwich panel

WALL TYPE:

Insulated 60mm sandwich panel

A subsidiary of Manor Athleticum, Jumbo is a hardware, home improvements and gardening retailer. With 41 branches and employing over 1500 employees it is the second-largest home improvement retailer in Switzerland.

The company's sustained growth alongside the popularity of the DIY and Home Improvements market meant Jumbo needed to extend their existing retail building.

Available in a range of colours and designs to suit individual needs HTS INDUSTRIEBAU are ideal as high visibility public facilities. The steel building provided for Jumbo was an A-framed Ultra-Span structure 20 metres wide by 55 metres long and with an eave height of 5.2 metres. The building was fully insulated with steel roof and wall panels, 3 roller shutter doors for vehicle access and 4 pedestrian doors.

With a much shorter lead and build time than a traditional building the project was finalised in less than 3 months, giving Jumbo the space they needed to accommodate ongoing customer demand.
